MLC 310 magnetic linear encoder systems measure non-contactly and gives the output signal as an incremental encoder pulse.

They are not affected by external factors due to its compact design. MLC 310 sensor is housed along the aluminum profile. Extra protection from dust, dirt and chips is provided by having a double seal protection system. It is the ideal solution for machining environments. It can be produced up to a measuring length of 20.000 mm.

MLC 310 Series Linear Encoders Are Mainly Used In:

- Lathes, Milling, Drilling, Grinding Machines
- Sheet Metal Working Machines
- Welding Machines
- Bending Machines
- Robotics/Materials Handling
- Marble Machines
- Wood Cutting Machines
- PVC Profile Cutting Machines
- Glass Working Machinery
- Etc...
